Login and Forgot Password:

In this section, we are reviewing the **Login and Forgot Password** process of the **Clarvs**.

The user first opens the login page using the designated URL link. On this page, there are two required fields: **Email or Username** and **Password**.

A screenshot of a login page titled "Login". It features two input fields: "Email or Username" and "Password". The "Password" field has an eye icon to toggle visibility. Below the fields is a checkbox labeled "Remember Me (skip OTP for 30 days on this device)". A large green "LOGIN" button is centered below the checkbox. At the bottom, there is a link that says "Forgot password?".

Login

Email or Username

Password

☐ Remember Me (skip OTP for 30 days on this device)

LOGIN

[Forgot password?](#)

To access the system, the user enters their registered email address and password. If the user wants the system to remember their login details, they can select the **Remember Me** checkbox. The user can also click the eye icon in the password field to show or hide the password while typing.

After entering the login credentials, the user clicks the **Login** button.

If two-step verification is enabled, the system redirects the user to the **Verify Code** page. A verification code is sent to the user's registered email address. The user enters the verification code into the code fields and then clicks on **Verify Code**.

Once the code is verified successfully, the user is redirected to the dashboard. For an admin user, the system opens the **Admin Panel**, where the admin can access the

overview, users, documents, reports, integrations, profile settings, and other admin features.

If the user forgets their password, they can return to the login page and click the **Forgot Password** link.

A screenshot of a 'Forgot password' form. It features a title 'Forgot password' in bold black text. Below the title is a text input field containing the placeholder 'you@example.com'. Underneath the input field is a green button with the text 'Send reset link' in white.

On the Forgot Password page, the user enters their registered email address and clicks on the **Send Reset Link**. The system then sends a password reset link to that email address.

A screenshot of a 'Reset password' form. It features a title 'Reset password' in bold black text. Below the title are two text input fields: the first is labeled 'New password' and the second is labeled 'Confirm password'. Both input fields have a small 'x' icon in the top right corner, indicating a clear function. Below the input fields is a green button with the text 'Continue' in white.

Clicking on the link the user enters on the Reset Password page. Now, enter a new password, confirm the same password, and click **Continue**.

Once the password is updated successfully, the user can log in with the new password.

Overall, this process allows users to securely log in to the platform using email, password, and verification code. It also provides a simple password recovery option through the forgotten password flow.

Overview:

In this section, we are looking at the **Admin Overview Dashboard** of the **Clarvs**.

After logging in as an admin, the user lands on the **Overview** page. This page provides a high-level summary of the fund's financial performance for a selected time period.

At the top-right side of the dashboard, the admin can select a date range using the **From** and **To** month dropdowns. The admin first chooses the starting month and then selects the ending month. After selecting the required period, the admin clicks the **Apply** button.

Once the filter is applied, the dashboard automatically updates the financial values based on the selected date range.

The **Initial Value** represents the fund value at the beginning of the selected period, and the **Current Value** represents the fund value at the end of the selected period.

Below that, the dashboard displays important performance metrics such as **ROI**, **MOIC**, and **Annualized IRR**. These values help the admin quickly understand how the fund has performed during the selected period.

On the right side, the **Portfolio Allocation** section visually shows how the fund is allocated across different investments. The chart compares the initial allocation and the current allocation side by side.

Each color in the donut chart represents a different investment. When the admin hovers over a section of the chart, the system shows more detailed information, including the investment company name, percentage allocation, and the related amount.

For example, the admin can hover over an investment segment to see how much of the portfolio is allocated to that specific company and what percentage it represents.

The admin can also use the **Reset** option to clear the selected filter and return the dashboard to the default view.

Overall, this Overview Dashboard allows the admin to quickly review fund performance, compare initial and current values, analyze ROI, MOIC, and IRR, and understand portfolio allocation in a simple visual format.

Debt Investments:

In this section, we are reviewing the **Debt Investments** feature.

This page allows the admin to view, search, filter, add, edit, and delete monthly **Debt Investments** balance records.

The screenshot displays the 'Debt Investments' dashboard. On the left is a sidebar with 'Admin Panel' and 'Financial Reporting Agent' at the top, followed by a 'DASHBOARD' section with links to 'Overview', 'Debt Investments' (highlighted), 'Documents', 'Reports', and 'Investment'. The main content area is titled 'Debt Investments' with a subtitle 'Company • Date • Balance'. It features a search bar 'Search company...', a filter dropdown set to 'All', and 'Refresh' and 'Add' buttons. Below is a table with the following data:

Company	Date	Balance	Actions
Diversified Wood Products, LLC	March 2026	\$419,088.24	⋮
THYNK	March 2026	\$135,000.00	⋮
Diversified Wood Products, LLC	February 2026	\$430,203.35	⋮

The debt investments records are displayed in a table format. Each row shows the **Company Name**, **Date**, **Loan Balance**, and available **Actions**. The admin can see multiple loan entries, including monthly balances for different companies.

At the top-right side of the page, there is a **Search** field. The admin can use this field to search debt investments records by company name. Once a company name is entered, the table automatically filters and shows the matching records.

Next to the search field, there is a **Date Filter** dropdown. The admin can select a specific month and year, such as November 2025, to view loan records only for that selected

period. The system then updates the table and displays the matching results. The admin can also use the **Refresh** button to reload the data.

Each loan record has two action buttons: **Edit** and **Delete**.

Company	Date	Balance	Actions	
Diversified Wood Products, LLC	December 2025	462912.2	Save	Cancel
THYNK	December 2025	\$135,000.00	Edit	Delete

When the admin clicks **Edit**, the selected row becomes editable. The admin can update the company name, date, and debt investments balance directly from the table. After making the changes, the admin can click **Save** to update the record or click **Cancel** to discard the changes.

Confirm Delete

Delete this loan record?

Type **DELETE** to confirm

If the admin wants to remove a debt investments record, they can click the **Delete** button. A confirmation popup appears to prevent accidental deletion. To confirm the deletion, the admin must type **DELETE** into the confirmation field and then click the **Delete** button. This ensures that records are not removed by mistake.

Debt Investment Information

Add a monthly debt investment balance.

Close

Select company

Debt Investment Amount

Enter balance

Date (Month and Year)

Save Debt Investment

Cancel

The admin can also add a new debt investments record by clicking the **Add** button. A **Debt Investment Information** popup appears where the admin can enter the debt investments details.

In this form, the admin selects the company name, enters the loan balance, and chooses the date by month and year. After filling in the required information, the admin clicks **Save Debt Investment** to add the new record to the system.

Debt Investment Information

Add a monthly debt investment balance.

If the required company is not already available in the company dropdown, the admin can click **Add Company**. A new section appears where the admin can enter the company name and add it to the dropdown. Once the company is added, it becomes available for

selection in debt investment form. The admin can then enter the balance and date and save the loan record.

Overall, the section helps the admin maintain monthly debt investment balances in an organized way. It allows the admin to search existing records, filter by date, edit ldebt investments information, safely delete records, and add new company debt investments balances when needed.

Documents:

This page allows the admin to upload files, create folders, organize documents, preview files, download files, and share documents with investors.

Upload

Destination folder: **Test-1**. Use the dropdown below to choose where files will go.

Folder:

Test-1

Tip: You can also **paste** a file (Ctrl/Cmd + V) directly into this page.

☐	peer-review-program-faqs	peer-review-program-faqs.pdf	787.8 KB	7/8/2026, 7:34:25 PM	—	

At the top of the page, there is an upload area where the admin can upload files by dragging and dropping them into the upload box, clicking the **Browse** option, or using the **Choose files** button. The system supports PDF, CSV, Excel files, and images, with a maximum file size of 50 MB per file.

The admin can also create a new folder by clicking the **New folder** button. After entering the folder's name, the folder is added to the document list. If needed, the admin can also create a subfolder inside an existing folder, which allows the document structure to be organized more clearly.

Before uploading a file, the admin can select the destination folder from the folder dropdown from the top of the left side. The admin can choose to upload the file to **All documents** or to a specific folder, such as **Test-1** or **Test-2**. This helps keep uploaded files organized from the beginning.

Next, the admin selects a file from the computer. In this example, a PDF capital statement file is selected. Once the file is chosen, the admin uploads it into the selected folder. After the upload is complete, the file appears under the folder with details such as the file name, original file information, file size, upload date, and sharing status.

For uploaded files, the action menu provides options such as **View**, **Download**, **Move to folder**, **Share with Investor**, and **Delete**.

When the admin clicks **View**, the system opens the file preview directly inside the dashboard. In this example, the PDF opens in a preview window, allowing the admin to review the statement without downloading it. The preview window also includes a **Download** option.

If the admin selects **Download**, the file is downloaded to the local computer.

The screenshot shows a 'Share' modal window titled 'Share "peer-review-program-faqs"'. At the top, it indicates the role is 'investor' and the sharing method is 'Document (Admin Files tab)'. Below this is a list of investors with checkboxes for selection. The first two investors are selected. At the bottom, there are 'Cancel' and 'Share' buttons.

Investor	Email	Selected
2012 Caprice Vallon Trine Crotty Irrev. Tr.	investor1011@example.com	☒
2012 Quest Trine Crotty Irrev. Tr.	investor1012@example.com	☒
3R, LLC	investor1128@example.com	☐
Alan Stockmeister	investor1076@example.com	☐
Alana Newcomer	investor1075@example.com	☐
Amanda J Wolfrum	investor1063@example.com	☐

The admin can also share the uploaded file with investors by selecting **Share with Investor** from the action menu. A shared popup appears with a list of investors. The admin can search for investors by name or email and select one or multiple investors from the list.

The admin can choose how the file should appear for the investor. It can be shared as a regular **Document**, which will appear in the investor's **Admin Files** tab, or it can be shared as a **Statement**, which will appear in the investor **Statements** tab.

After selecting the required investors and choosing the correct sharing type, the admin can complete the sharing process.

Overall, the Documents section allows the admin to manage all fund-related files in one place. The admin can create folders and subfolders, upload documents, organize files,

preview and download documents, and securely share selected files with specific investors.

Reports:

In this section, we are reviewing the **Reports** feature from the Admin Panel.

After logging in as an admin, the user opens the **Reports** section from the left sidebar menu. This page allows the admin to preview financial reports and download report data as **CSV** or **XLSX** files.

Reports

Preview reports or download as CSV/XLSX.

1) Investor Period Balance Report

Detailed balance report per investor showing beginning/ending balances, contributions, distributions, fees, and returns by month.

Jan 2025

Jan 2025

Non-Profit

#	Investor Name	Account Number	Account Type	Investment Start Date	Jan-25 Beginning Balance	Jan-25 Contribution	Jan-25 Gross Profit
1	Blackbird Mission Church	1106	Non-Profit	2024-01-31	\$152,370.76	\$75,000.00	-\$151.62
2	Horizon Christian Fellowship Central Inc	1081	Non-Profit	2022-02-28	\$465,172.75	\$0.00	-\$462.87

The first report is the **Investor Period Balance Report**. Here, the admin can select the start month, end month, and account type. After clicking **Preview**, the system displays investor-wise balance information, including beginning balance, contribution, gross profit, and other financial values for the selected period. The admin can also download this report as a CSV or XLSX file.

2) Annual XIRR Report (Full-year only)

XIRR is calculated only when all 12 months exist for that year (no missing months).

6	Anthony W LeCount	138	1090	Savings	2025	true
7	Barbara Watson Revocable Trust As Amended and Updated May 8, 2015, David Newcomer, TTEE	139	1030	Trust	2025	true

The second section is the **Annual XIRR Report**. This report is used to review annual return information for investors. The admin can select a year, choose an account type, and keep the **Only complete years** option selected if they want the report to include only investors

with a full 12 months of available data. After clicking **Preview**, the report displays investor details such as investor name, investor ID, account number, account type, year, and full-year availability. The admin can also export this report as CSV or XLSX.

3) Monthly Returns / Valuation Trend

Export monthly balances and flows. Fund aggregate or a single investor.

#	Month	Total Beginning Balance	Total Ending Balance	Total Contributions	Total Distributions	Total Net Cash Flow	Total Net Income/(Loss)
1	2026-01	\$119,452,923.95	\$119,129,374.15	\$0.00	\$0.00	\$0.00	-\$323,549.80

The third report is the **Monthly Returns / Valuation Trend** report. The admin can select a start month, end month, and choose whether to view the fund aggregate data or a single investor report. Based on the selected filters, the system previews the monthly balance and valuation trend data.

The admin can also use the **Reset** button to clear the selected filters and return each report section to its default state.

Overall, the Reports section helps the admin generate, preview, and export important financial reports, including investor period balances, annual XIRR, and monthly valuation trends from one centralized page.

Investment:

This page is used to manage monthly investment valuation entries for different companies.

The screenshot displays the 'Admin Panel' for a 'Financial Reporting Agent'. The left sidebar contains navigation links for Dashboard, Users, Profile, and Integration. The main content area is titled 'Investment' and shows a table of 'Saved Valuation Entries'. The table has columns for Company Name, Amount, Date, and Action. The data shows various companies with their respective investment amounts and dates. At the bottom, there is a pagination control showing 'Page 1 of 138'.

Company Name	Amount	Date	Action
Barrister Capital Acquisitions, LLC	\$1,435,157.00	2025-12-31	Edit Delete
Impact Contracting Solutions, LLC	\$5,000.00	2025-12-31	Edit Delete
Mesh Systems LLC	\$2,588,317.42	2025-12-31	Edit Delete
Pike Plastics Recycling	\$4,733,015.00	2025-12-31	Edit Delete
Purchasing Platform, Inc.	\$6,298,239.00	2025-12-31	Edit Delete
SIMFONI	\$525,865.84	2025-12-31	Edit Delete
Supernova Companies LLC	\$96,432,697.00	2025-12-31	Edit Delete
Validus Venture Group (CasePacer)	\$14,971,497.00	2025-12-31	Edit Delete
Barrister Capital Acquisitions, LLC	\$1,435,157.00	2025-11-30	Edit Delete
Impact Contracting Solutions, LLC	\$5,000.00	2025-11-30	Edit Delete
Total Amount	\$4,776,768,651.65		

The main table displays all saved valuation entries. Each row includes the **Company Name**, **Investment Amount**, **Date**, and available **Actions**. From this table, the admin can review the investment values recorded for each company by month.

At the top-right side of the table, there is a **Search** field. The admin can search for a specific company by entering the company name. Once the search is applied, the system filters the table and displays only the matching company records.

Next to the search field, there is a **Month Filter** option. The admin can select a specific month and year, then click the **Filter** button. The system will display only the investment valuation entries available for that selected month. If there is no data for the selected month, the system shows a message saying that no investment values were found.

The admin can also click the **Reset** button to clear the search and month filter and return to the full list of saved valuation entries.

Saved Valuation Entries

Add, edit, or delete monthly valuation entries.

Company Name	Amount	Date	Action
Barrister Capital Acquisitions, LLC	1435157	Dec 2025	Save Cancel
Impact Contracting Solutions, LLC	\$5,000.00	2025-12-31	Edit Delete

Each investment record includes **Edit** and **Delete** options. The **Edit** option allows the admin to update an existing valuation entry, and the **Delete** option allows the admin to remove an incorrect or unnecessary entry.

If the company is not available in the dropdown list, the admin can click **Add Company**. A new section appears where the admin can type the company name and click **Add to Dropdown**. This adds the company name to the dropdown temporarily. The company will only be saved into the system after the admin submits the main investment form with the investment value and date.

The Investment section allows the admin to maintain monthly investment valuation data in an organized way. The admin can search company records, filter valuation entries by month, reset filters, add new investment values, add new company names, and manage existing records using edit or delete actions.

The users are displayed in a table format. Each row includes the user’s **Name**, **Email**, **Type**, **Organization**, **Status**, and **Date Created**. This helps the admin quickly identify whether a user is an investor, admin, or group admin, and also check whether the account is active or inactive.

At the top of the page, there is a search field. The admin can search users by name, email address, or organization. Once a search keyword is entered, the system filters the list and displays matching users only.

Next to the search field, there is a **User Type** filter. This allows the admin to filter users by specific role. The available options include **Investor**, **Admin**, and **Group Admin**. For example, when the admin selects **Admin**, the system displays only admin users. When the admin selects **Group Admin**, the system displays only users who have group admin access.

The admin can also filter users by **Status**. The available status options are **Active** and **Inactive**. This helps the admin quickly review currently active accounts or identify inactive user accounts.

There is also a sorting dropdown that controls how the user list is ordered. The admin can sort users by **Date Created**, either the newest first or oldest first. The admin can also sort users alphabetically by name, using **Name A–Z** or **Name Z–A**.

At the bottom of the table, pagination controls are available. The admin can move between pages, change the number of rows displayed, and review the full user list without loading all records at once.

Overall, the Users section gives the admin a simple way to manage and review all platform users. The admin can search by name, email, or organization, filter by user type and status, sort the list by date or name, and navigate through all user records using pagination.

Investors:

This page allows the admin to view, search, filter, edit, and invite investors from one centralized area.

The investors are displayed in a table format. Each row includes important investor details such as the **Investor Name**, **Company**, **Email Address**, **Account ID**, **Contact**, **Investor Type**, **Parent Account**, **Invested On**, **Accepted On**, **Account Status**, **Current Balance**, and available **Actions**.

At the top of the page, there is a search field. The admin can use this field to search investors by name, company, email, or account number. This helps the admin quickly find a specific investor from the full investor list.

Next to the search field, the admin can use the **Investor Type** filter. This allows the list to be filtered by different investor categories, such as individual, trust, IRA, retirement account, corporation, or other investor types.

The admin can also filter investors by **Status**, such as active or inactive. This makes it easier to review only the currently active investor accounts or identify inactive accounts when needed.

There is also a sorting option that allows the admin to organize the investor list by date or alphabetically. For example, the admin can sort by the newest created, oldest created, name A to Z, or name Z to A.

Update

Each investor row includes an action option. When the admin clicks on the edit option, an **Edit Investor** popup appears. From this popup, the admin can update investor information such as the investor name, email address, account ID, investor type, and account status. After making the required changes, the admin clicks **Update** to save the changes.

If no change is needed, the admin can click **Cancel**.

The image shows a web interface for managing investors. At the top left, the word "Investors" is displayed. To its right is a yellow badge that says "Pending: 0" and a blue button labeled "+ Add Investor". Below these are three filters: a search bar with the placeholder "Search by name, company, email, or acco", and two dropdown menus labeled "All Types" and "All Statuses". To the right of these is another dropdown menu labeled "Name (A-Z)".

The admin can also add a new investor by clicking the **Add Investor** button at the top-right side of the page. An invitation form appears where the admin enters the investor's name and email address.

The image shows a modal form titled "Invite Investor". At the top right of the modal is a yellow badge that says "Pending: 0" and a close button (X). The form contains the following fields:

- Name**: A text input field with the placeholder "Investor full name".
- Email**: A text input field with the placeholder "email@example.com".
- Account ID**: A text input field with the placeholder "e.g. 1001 or 1001-a". Below this field is a note: "Must be unique. Use 4 digits, optionally with a letter suffix, e.g. 1001, 1001-a, 1001-b."
- Investor Type**: A dropdown menu with "Savings" selected.
- Account Status**: A dropdown menu with "Active" selected.

At the bottom right of the form are two buttons: "Cancel" and "Invite".

Inside this form, the admin first creates the main investor account by entering name, email, account id, selecting the investor type and account status as active or inactive.

After completing the required fields, the admin clicks **Invite**. This sends an invitation to the investor so they can create their account and access the investor portal.

Invite

If the admin needs to create a related account, they can select the related investor option during the invitation process. The admin then chooses the primary investor from the dropdown list and defines the relationship between the related account and the main investor account. This allows the related account to be connected properly with the primary investor's record.

westonjones@gmail.com	Weston Jones	1120	Related	7/9/2026, 2:51:52 PM	Resend Cancel

The Admin can go to the **Investors** section and open the **Pending Invitations** tab to view all pending investor invitations. The table shows the investor’s **Email, Name, Account ID, Type, Sent Date**, and available **Actions**.

From this section, the Admin can **Resend** the invitation if the investor did not receive the email, or **Cancel** the invitation if it is no longer needed.

Overall, the Investors section gives the admin full control over investor records. The admin can search for investors, filter by type and status, sort the list, and update investor details.

Group Investor Account:

This page is used to create and manage group investor accounts. A group investor account allows one selected investor to manage or view multiple related investor accounts under one grouped structure.

Group Investor Account

Manage investor groups, assign admins, and control group-level access.

Group Investor Accounts

+ Add Group Investor Account

Add Selected

Once the group investor account has been created, the admin can assign investors to that group. To do this, the admin clicks on the **Add Investors** option from the action area.

A new popup appears with a list of available investors. The admin can select one or multiple investors from this list and then click **Add Selected**. This connects the selected investor accounts to the group investor account.

After the investors are added, the admin can expand the group investor row to view the connected investor accounts under that group. The system displays the assigned investors in a nested list, showing which accounts are connected to the selected group investor account.

REMOVE

Cancel Remove

If any assigned investor account needs to be removed from the group, the admin can use the remove option from the assigned investor list.

Overall, the Group Investor Account section allows the admin to create a group-level investor account, assign multiple investor accounts under that group, review grouped investor relationships, update group account information, and manage connected investor accounts in an organized way.

Add Admin:

This page allows an existing admin user to invite a new admin user to the platform.

A form titled "Add Admin" with the subtitle "Invite a new admin user by email." The form has two input fields: "Name" and "Email". Below the "Email" field is a blue button labeled "Send Invitation".

Add Admin

Invite a new admin user by email.

Name

Email

Send Invitation

The page displays a simple invitation form with two required fields: **Name** and **Email**.

First, the admin enters the name of the new admin user in the **Name** field. Then, the admin enters the user's email address in the **Email** field.

After entering the required information, the admin clicks the **Send Invitation** button.

Once the invitation is sent, the new admin user will receive an email invitation. Through that invitation, the user can complete the account setup process and access the platform as an admin.

This feature helps the organization add new admin users in a controlled and secure way. Only an existing admin can send an invitation, and the new admin must use the invitation link to activate their account.

All Admins:

This page allows the admin to view and manage all admin users who currently have access to the platform.

The screenshot displays the 'All Admins' page within the 'Admin Panel' for a 'Financial Reporting Agent'. The interface includes a left sidebar with navigation options: DASHBOARD (Overview, Debt Investments, Documents, Reports, Investment), USERS (Users, Investors, Group Investor Account, Bulk Create Investors, Add Admin, All Admins), and PROFILE (My Profile, Settings). The main content area is titled 'All Admins' and features a search bar with the placeholder 'Search by name, email, status' and a '+ Add New Admin' button. Below the search bar are two tabs: 'All Admins' (selected) and 'Pending Invitations'. A table lists the current admin users:

Name	Email	Status	Permission	Action
Silas Newton	silas@elpiscapital.com	Active	Editor	...
Ace	ace@ba3digitalmarketing.com	Active	Editor	...
Sadie Piller	sadie@elpiscapital.com	Active	Editor	...
Ben Jones	ben@elpiscapital.com	Active	Editor	...
BA3 AI	ba3ai@elpiscapital.com	Active	Editor	...

Below the table, it indicates 'Showing 5 of 5 admins'. In the top right corner, there are notification and chat icons, and a 'Chat' button is located in the bottom right corner.

The admin users are displayed in a table format. Each row includes the admin's **Name**, **Email Address**, **Status**, **Permission**, and available **Actions**. This helps the admin quickly review who has admin access and what permission level they currently have.

On the top-right side of the page, there is a search field. The admin can use this field to search by name, email, or status. Once a search keyword is entered, the system filters the list and displays the matching admin records.

Delete

The status field allows the admin to set the account as active or inactive. After making the required changes, the admin clicks on **Save Changes** to update the admin profile. If no change is needed, the admin can click **Cancel** or close the popup. You can also **DELETE** an admin from the list as per the requirement.

The admin can also add a new admin user by clicking the **Add New Admin** button. This opens an **Add Admin** popup form. In this form, the admin enters the new user's **Name**, **Email Address**.

After entering the required information, the admin clicks the **Send Invitation** button. The new admin user will receive an invitation email and can use that invitation to complete the account setup process.

The Admin can go to the **All Admins** section and open the **Pending Invitations** tab to view all pending admin invitations. The table shows the admin's **Email**, **Name**, **Sent Date**, and available **Actions**.

If there are no pending admin invitations, the system shows a message: **“No pending admin invitations.”**

My Profile:

This page allows the admin to view and manage their own profile information, update personal details, change the account password, and review account information.

Block User

E. Robert Edwards Revocable Trust will lose access to their account.

Block Reason *

Enter the reason for blocking this user...

Cancel

Block User

Each user row includes action buttons such as **Block** and **Reset Password**. If the admin clicks on **Block**, a confirmation popup appears. The admin must enter a block of reason before confirming the action. Once blocked, the user will lose access to their account.

The **Reset Password** button allows the admin to send a password reset email to the selected user.

Overall, the Settings section gives the admin control over important system-level configurations. The admin can update statement branding, manage GP account settings, monitor user activity, block or unblock user accounts, and send password reset links from one centralized settings page.

QuickBooks:

In this section, we are reviewing the **QuickBooks Online Connection** process from the Clarvs.

This page allows the admin to connect the platform with QuickBooks Online for admin-only financial data retrieval.

At the beginning, the QuickBooks status shows **Not Connected**. To start the connection process, the admin clicks the **Connect QuickBooks** button.

The system redirects the admin to the Intuit login page. Here, the admin enters the Intuit account password and clicks **Continue**. If required, the admin can also choose the text code verification option.

The image shows a screenshot of the Intuit login interface. At the top, it says "Welcome, BA3 (Not You?)". Below this is the heading "Please select your company". There are two search sections. The first is "Search for a company or firm" with a dropdown menu showing "BA3 Accounting" and a checkmark icon. To the right of this is a checkbox labeled "Install for your firm". The second search section is "Search for a client" with a dropdown menu showing "Elpis Opportunity Fund" and a checkmark icon. Below these is a link that says "Apps already connected to Elpis Opportunity Fund" with a downward arrow. At the bottom of the form are two buttons: "No, thanks" and "Next". The footer contains the copyright notice "©2026 Intuit Inc. All rights reserved." and the Intuit logo.

After logging in, Intuit asks the admin to select the company or client that should be connected. The admin selects the correct firm and then chooses the required QuickBooks client, such as **Elpis Opportunity Fund**.

Once the correct company is selected, the admin clicks **Next**. Then, Intuit shows a permission confirmation page explaining that the Financial Reporting system will be connected to the selected QuickBooks company.

To approve the connection, the admin clicks on **Connect**. This authorizes the Financial Reporting system to access the selected QuickBooks Online data.

After the connection is completed, the admin is redirected back to the QuickBooks Integration page. The connection status changes to **Connected**, and the page shows the environment, Realm ID, and latest sync status.

The admin can then click the **Sync** button to import financial data from QuickBooks into the system. The sync runs on the server, so closing the page will not stop the process.

If the QuickBooks company or permission access changes later, the admin can use the **Disconnect** button and reconnect QuickBooks again to refresh the access.

Overall, this QuickBooks connection process allows the admin to securely connect to QuickBooks Online, authorize the correct company, sync financial data, and make that data available inside the Financial Reporting Agent system.

Clarvs Admin AI Chatbot:

The **Clarvs Admin AI** chatbot helps admins quickly access important funds and investor information through simple queries.

Using the chatbot, the admin can ask for total fund, portfolio company, loan related information, investor details, and individual investor data such as beginning balance, management fee, operating expense, ending balance, ROI, MOIC, and periodical statements.

The admin can also use the chatbot to update investor information when needed, send emails to investors, and retrieve files from the system by searching with the file name.

Overall, the Clarvs Admin AI makes it faster and easier for admins to find financial data, manage investor information, communicate with investors, and access important documents from one simple chat interface.

Notifications and Mailbox:

After logging in as an admin, the user can access notifications from the bell icon at the top-right side of the dashboard. When the admin clicks on the notification icon, a notification panel opens.

Inside this panel, the admin can review different types of requests and system updates. The notification panel includes separate tabs for **Invites**, **Delete Requests**, **Related Requests**, and **Group Requests**.

In the **Invites** tab, the admin can see pending invitation records. Each invite shows the investor's name, email address, invitation status, and the date and time when the invitation was created. If needed, the admin can also cancel an invitation directly from this section.

The **Delete Requests** tab shows any pending account deletion requests. If there are no pending delete requests, the system displays a clear message saying that no pending delete requests are available.

The **Related Requests** tab is used to review related investor account requests. If there are no related investor requests, the system shows an empty state message.

The **Group Requests** tab is used to review group account requests. If no group account requests are available, the system displays that information clearly.

The admin can also open the **Mailbox** from the mail icon at the top-right side of the dashboard. This mailbox is used to review mails received from investors. If there is no mail available, the system shows a “No messages” message. The admin can also use the **Refresh** button to reload the mailbox and check for new messages.

Overall, the Notifications and Mailbox section help the admin quickly monitor pending invitations, delete requests, related investor requests, group account requests, and investors' messages from one easy-to-access area.

General Investor:

Invitation form:

Investor Invitation Acceptance and Account Creation Process:

First, the investor receives an invitation email from the system. The email includes an **Accept Invitation** button. To start the account setup process, the investor clicks this button.

After clicking the invitation link, the investor is redirected to the account creation page. On this page, the system confirms that the investor is creating a new investor login for the assigned account.

Personal Information

You're creating a new investor login for **Savings**.

First Name*

Emon

Last Name*

Birthdate*

mm/dd/yyyy

Citizenship*

United States

Email*

emon@ba3digitalmarketing.com

Phone*

SSN / Tax ID*

Emergency Contact (Phone Number)

Enter emergency contact

SSN / Tax ID is an encrypted attribute

Password*

Strong password (8+ chars, upper/lower/number/special)

The investor then completes the **Personal Information** section. This includes required fields such as **First Name**, **Last Name**, **Birthdate**, **Citizenship**, **Email**, **Phone Number**, **SSN or Tax ID**, and **Password**. The email field is already filled in from the invitation, and the investor creates a strong password for login access.

Residential Address

Street Address 1*

Street Address 2 (Optional)

Country*

City*

State / Province*

Zip / Postal Code*

Create Account

Next, the investor completes the **Residential Address** section. This includes **Street Address, Country, City, State or Province, and ZIP or Postal Code.**

After completing all required information, the investor clicks the **Create Account** button. The system then creates the investor login and connects it with the invited investor account.

Overall, this process allows an invited investor to securely accept their portal invitation, complete their personal and address information, create a password, and activate their investor account.

Login and Forgot Password:

In this section, we are reviewing the **Login and Forgot Password** process of the **Clarvs.**

The user first opens the login page using the designated URL link. On this page, there are two required fields: **Email or Username** and **Password.**

The image shows a login form with a white background and a light gray border. At the top, the word "Login" is centered in a bold, black font. Below it, there are two input fields. The first is labeled "Email or Username" and is a simple white rectangle with a light gray border. The second is labeled "Password" and is a white rectangle with a light gray border, featuring a small eye icon on the right side to toggle password visibility. Below the password field is a checkbox labeled "Remember Me" with the text "(skip OTP for 30 days on this device)" in a smaller font. At the bottom of the form is a large, solid green button with the word "LOGIN" in white, uppercase letters. Below the button is a link that says "Forgot password?" in a green font.

To access the system, the user enters their registered email address and password. If the user wants the system to remember their login details, they can select the **Remember Me** checkbox. The user can also click the eye icon in the password field to show or hide the password while typing.

After entering the login credentials, the user clicks the **Login** button.

If two-step verification is enabled, the system redirects the user to the **Verify Code** page. A verification code is sent to the user's registered email address. The user enters the verification code into the code fields and then clicks on **Verify Code**.

Once the code is verified successfully, the user is redirected to the dashboard. For an admin user, the system opens the **Investor Panel**, where the admin can access the overview, users, documents, reports, integrations, profile settings, and other admin features.

If the user forgets their password, they can return to the login page and click the **Forgot Password** link.

A screenshot of a 'Forgot password' form. It features a title 'Forgot password' in bold black text. Below the title is a text input field containing the placeholder 'you@example.com'. Underneath the input field is a green button with the text 'Send reset link' in white.

On the Forgot Password page, the user enters their registered email address and clicks on the **Send Reset Link**. The system then sends a password reset link to that email address.

A screenshot of a 'Reset password' form. It features a title 'Reset password' in bold black text. Below the title are two text input fields. The first field is labeled 'New password' and the second is labeled 'Confirm password'. Both fields have a small icon on the right side, likely for password strength or visibility. Below the input fields is a green button with the text 'Continue' in white.

Clicking on the link the user enters on the Reset Password page. Now, enter a new password, confirm the same password, and click **Continue**.

Once the password is updated successfully, the user can log in with the new password.

Overall, this process allows users to securely log in to the platform using email, password, and verification code. It also provides a simple password recovery option through the forgotten password flow.

Overview:

This dashboard gives the investor a clear summary of their investment performance for a selected period.

At the top of the page, the investor can see the account they are currently viewing, along with the available data range and joining date. The investor can select a custom period using the **From** and **To** month dropdowns. After choosing the required start and end months, the user clicks the **Apply** button, and the dashboard updates automatically based on the selected period.

The dashboard displays key financial metrics, including **Initial Value**, **Current Value**, **ROI**, **MOIC**, **Annualized IRR**, and **ROI Growth of the S&P 500**. These values help the investor quickly understand their investment performance and compare it with the market benchmark.

On the right side, the **Portfolio Allocation** chart shows how the investor’s current value is distributed across different portfolio companies. The donut chart provides a visual breakdown of the investment allocation.

Below the summary cards, the investor can compare monthly ROI with different companies like **S&P 500, Dow, Nasdaq etc.** The user can also change the chart view, such as viewing the data in a cumulative layout or a bar graph layout.

In the cumulative layout, the chart shows how the investor's ROI changed over time compared with different companies. In the bar graph layout, the chart displays monthly ROI differences side by side, making it easier to compare individual monthly performance.

The investor can also use the **Reset** button to clear the selected filters and return to the default overview.

Overall, the Investor Overview Dashboard helps investors quickly review their investment value, performance metrics, portfolio allocation, and ROI comparison with different companies from one simple and visual dashboard.

Portfolio:

This page allows the investor to review their portfolio summary and investment details in one place.

At the top of the page, the investor can use the **From** and **To** date filters to select a specific period. Based on the selected date range, the dashboard automatically updates the financial amounts, including the initial value, current value, ROI, MOIC, and portfolio allocation.

The **Portfolio Summary** section helps the investor understand how their investment performed during that specific timeframe.

On the right side, the **Portfolio Allocation** chart shows how the investor’s current value is distributed across different portfolio companies. Each chart segment represents a different investment.

Chat

The statements are displayed in a table format. Each row includes important details such as the **Download PDF**, **File Name**, **Investor Name**, **View Statement Entity**, **Statement End Date**.

The investor can use the **Search** field to quickly find a specific statement by typing a keyword, date, investor name, or file name.

The **Sort** dropdown allows the investor to organize statements by order, such as **New to Old** or **Old to New**. This helps the investor quickly find the most recent or older statements.

Each statement includes a **View** button. When the investor clicks **View**, the system opens the statement in a preview window. This allows the investor to review the statement directly inside the dashboard without downloading it first.

The investor can also click the **Download** button to download the PDF statement to their local device.

The **Edit Columns** option allows the investor to customize which columns are visible in the table. The investor can select or remove columns such as Download PDF, File Name, Investor, View Statement, Entity, and Statement End Date. This helps the investor adjust the table view based on the information they want to see.

At the bottom of the page, there is also an **Uploaded Statements** section. This section shows any statement files that have been shared with the investor by the admin. If no uploaded statements are available, the system displays a clear message.

Admin Files:

This page allows the investor to access documents that have been shared by the admin.

Admin Files	
Documents shared with you by admin.	
Search across all folders... Sort: Date ↓ (New → Old) ▾	
NAME	DATE UPLOADED
>  Test-1	7/8/2026
 Follow Up Request for 2025 Budget Requirements and Input	7/9/2026

The page displays shared documents in an organized folder structure. If the admin has shared a folder, the investor can see that folder on this page along with the upload date.

The investor can click the arrow beside a folder to expand it. Once expanded, the system displays all files available inside that folder. Investor can view and download the file by clicking on the required file.

At the top-right side of the page, the investor can use the search field to search across all shared folders and files. This helps the investor quickly find a specific document by typing the file name or keyword.

The investor can also use the sort of dropdown to organize files by date, such as **New to Old** or **Old to New**. This makes it easier to find recently shared or older documents.

Overall, the **Admin Files** section allows investors to securely access documents shared by the admin, browse folder-based files, expand folders, search for specific documents, and sort files by uploading date from one simple page.

Below that, the **Residential Address** section allows the investor to manage address details, including address line 1, address line 2, country, state, city, and ZIP or postal code.

After updating the required fields, the investor saves the changes. The system then confirms that the profile information has been updated successfully.

Overall, the Personal Info section allows investors to keep their profile, banking details, and residential address information accurate and up to date from one secure page.

Accreditation:

This page allows the investor to update their accreditation status by selecting the option that best describes their financial qualifications.

The screenshot shows a web form titled "Accreditation Status". In the top right corner of the form is a blue "Save" button. Below the title, there is a green banner with the text "Accredited" and "You meet the criteria to be an accredited investor." Below this banner, there are five radio button options for selecting the best description of the investor's financial qualifications. The first option, "I have at least \$5M in investments", is selected. The other options are "I have between \$2.2M and \$5M in assets", "I have between \$1M and \$2.2M in assets", "I have income of \$200k (or \$300k jointly with spouse) for the past 2 years and expect the same this year", and "I am a Series 7, Series 65, or Series 82 holder and my license is active and in good standing". At the bottom of the form, there is a small instruction: "Select the option that best describes you, then click **Save** to continue."

Accreditation Status Save

Accredited
You meet the criteria to be an accredited investor.

☒ I have at least \$5M in investments

☐ I have between \$2.2M and \$5M in assets

☐ I have between \$1M and \$2.2M in assets

☐ I have income of \$200k (or \$300k jointly with spouse) for the past 2 years and expect the same this year

☐ I am a Series 7, Series 65, or Series 82 holder and my license is active and in good standing

Select the option that best describes you, then click **Save** to continue.

At the top of the page, the system displays the current accreditation status. In this example, the investor is marked as **Accredited**, and the system confirms that the investor meets the criteria to be an accredited investor.

The investor selects the option that best matches their situation. After selecting the correct option, the investor clicks the **Save** button to update the accreditation information.

Once saved, the system keeps the selected accreditation status connected to the investor's profile.

Overall, the Accreditation section allows investors to confirm and update their accredited investor status in a simple and organized way directly from the investor portal.

Contacts:

This page allows the investor to manage their personal or business contact list in one place.

Search by anything 		Export	Hide columns	 Add Contact
NAME	EMAIL	PHONE	NOTES	Action
S.N.I. Emon	emon@ba3digitalmarketing.com	01684815166	Hi	
Weston Jones	weston@ba3digitalmarketing.com	7252331230	—	
Ben Jones	mlaccc@gmail.com	7252331230	—	

The contacts are displayed in a table format. Each row includes the contact's **Name**, **Email Address**, **Phone Number**, **Notes**, and available **Actions**.

At the top of the page, the investor can use the **Search** field to quickly find a contact by name, email, phone number, or any related keyword.

The investor can also use the **Export** button to export the contact list when needed. The **Hide Columns** option allows the investor to customize which columns are visible in the table.

Save Contact

To add a new contact, the investor clicks the **Add Contact** button. A popup form appears where the investor enters the contact's name, email address, phone number, and optional notes. After filling in the required information, the investor clicks on **Save Contact** to add the new contact to the list.

Each contact row includes an action menu. From this menu, the investor can edit an existing contact or delete a contact if it is no longer needed.

Overall, the Contacts section allows investors to store, search, organize, export, and manage their important contact information from one simple page.

Settings:

This page allows the investor to manage account security, request a related investor account, and request group investor access.

The screenshot shows a modal dialog titled "Change password" with a close button (X) in the top right corner. Below the title, it indicates "Step 1 of 3". The main heading is "Email address". There is a text input field containing the placeholder text "you@example.com". Below the input field is a blue button labeled "Send verification code".

At the top of the page, the investor can see the **Security** section. From here, the investor can click **Change Password** to update their account password.

The screenshot shows the same "Change password" modal dialog, now at "Step 2 of 3". A green message box states: "If this email exists, a 6-digit code has been sent." Below this, the heading is "Verification code". There is a text input field containing the placeholder text "123456". Below the input field, it says "Enter the 6-digit code sent to **emon@ba3digitalmarketing.com**." At the bottom is a blue button labeled "Verify code".

Change password

Step 3 of 3

Code verified. You can now choose a new password.

New password

Confirm new password

Update password

The password change process has three steps. First, the investor enters their email address and clicks **Send Verification Code**. Then, the system sends a six-digit verification code to the investor's email. In the second step, the investor enters the verification code and clicks the **Verify Code**. Once the code is verified, the investor can enter a new password, confirm the new password, and click **Update Password** to complete the password change process.

Add Related Investor

Investor Name

Full name as on the account

Investor Email

their.email@example.com

Cancel

Send Request

The page also includes a **Related Investors** section. This allows the investor to request adding a person as a related account. The investor clicks **Add Related Investor**, enters the investor's name and email address, and then clicks **Send Request**. This request is then sent to the admin for review and approval.

Create Group Investor

Enter the investor you want to include in your group. You can send multiple requests to add more investors.

Investor Name

Full name as on the account

Investor Email

their.email@example.com

Cancel

Submit Request

Below that, the **Group Investor** section allows the investor to request to add investors as a group member. The investor clicks **Create Group Investor**, enters the investor name and email address they want to include in the group, and then clicks **Submit Request**. The

investor can send multiple requests if they need to add more investors to the group. These requests will also be reviewed and approved by an admin.

Overall, the Settings section allows investors to securely change their password, request related investor access, and request group investor access from one simple and organized page.

Related Accounts:

This page allows the investor to view any related investor accounts that are connected to their profile.

Related Accounts				
Investor	Email	Type	Relation	Delete Request
Emon Jones	emon@ba3digitalmarketing.com	Related	Trust	<button>Request delete</button>

The related accounts are displayed in a table format. Each row includes the related investor's **Name**, **Email Address**, **Account Type**, **Relationship**, and available **Delete Request** option.

From this page, the investor can quickly confirm which related account is connected to their profile and what relationship type is assigned, such as trust or another related category.

If the investor wants to remove a related account connection, they can click the **Request Delete** button. This does not delete the account immediately. Instead, it sends a delete request to the admin for review and approval.

Overall, the Related Accounts section allows investors to view connected related accounts and request removal when needed, while keeping the final approval process under admin control.

Investor AI Chatbot:

In this section, we are reviewing the **Investor AI Chatbot** feature of the **Clarvs** from the investor side.

The Investor AI Chatbot helps investors quickly access their own financial data and account information by simply typing a query into the chat.

Using the chatbot, an investor can ask for financial information from any available period, such as **Beginning Balance**, **Ending Balance**, **ROI**, **MOIC**, **Management Fee**, **Operating Expense**, and **Profit or Loss**.

The investor can also use the chatbot to view statements for any quarter, search for files by file name, update profile information through a prompt, and email the admin directly from the chat.

The chatbot only provides information related to the logged-in investor's own account, so all data remains secure and restricted to the correct investor.

Overall, the Investor AI Chatbot makes it easier for investors to find financial data, review statements, search documents, update profile details, and communicate with the admin from one simple chat interface.

Notifications and Mailbox:

In this section, we are reviewing the **Notifications and Mailbox** feature of the **Clarvs** from the investor side.

When the investor clicks on the notification icon, a notification panel opens.

Inside this panel, the investor can review recent updates such as related investor request approvals, new related investor requests, and investor statement notifications. Each notification shows the title, status, date, time, and a **View** option.

The investor can mark notifications as read, clear all notifications, or close individual notification items if needed.

The investor can also open the **Mailbox** by clicking the mail icon at the top-right side of the dashboard. The mailbox shows any messages received through the system. If there are no messages available, the system displays a clear “No messages yet” message.

Overall, the Notifications and Mailbox section help investors stay updated on account-related requests, statement availability, and system messages from one easy-to-access area.

Group Investor Admin:

Note: When an investor logs in as a **Group Admin**, the financial data shown in the **Overview** and **Portfolio** sections does not represent only their own individual investment data. Instead, it shows the combined financial result of the investor's own account along with all connected group member accounts.

Chat

From the **My Group** section, the Group Admin can view their own individual data as well as the individual data of each group member separately.

All other features will work the same way as a general investor account.

Related Investor Account:

Note: Invitation forms fill-up, Login and forgot password processes are the same as the investor.

Investor Portfolio:

In this section, we are reviewing the **Portfolio** feature of the **Clarvs** from the **Related Investor** perspective.

After logging in as a related investor, the user opens the **Portfolio** section from the left sidebar menu. At the top of the page, the system shows a message confirming that this investor is connected as a related investor for the primary investor account.

This means the financial data shown on this page is not separate related account data. Instead, the portfolio information is based on the connected primary investor account.

At the top of the Portfolio page, the related investor can use the **From** and **To** date filters to select a specific period. After selecting the date range, the user clicks the **Apply** button. Based on the selected date filter, the portfolio summary, financial values, and allocation chart update automatically.

The **Portfolio Summary** section displays important values such as **Initial Value**, **Current Value**, **ROI**, and **MOIC** for the selected period.

On the right side, the **Portfolio Allocation** chart shows how the current value is distributed across different portfolio companies. When allocation data is available, the chart visually displays the investment breakdown by the company.

Search by anything		
NAME	INVESTMENT	DATE
Supernova Companies LLC	\$691,204	Dec 31, 2025
Validus Venture Group (CasePacer)	\$107,312	Dec 31, 2025
Purchasing Platform, Inc.	\$45,144	Dec 31, 2025
Pike Plastics Recycling	\$33,925	Dec 31, 2025
Mesh Systems LLC	\$18,552	Dec 31, 2025
Barrister Capital Acquisitions, LLC	\$10,287	Dec 31, 2025
SIMFONI	\$3,769	Dec 31, 2025
Impact Contracting Solutions, LLC	\$36	Dec 31, 2025
Total Investment	\$910,229	

Below the summary section, the portfolio table lists the available portfolio companies, investment amounts, and dates. The related investor can also use the search field to quickly find a specific company or investment record.

Overall, the Related Investor Portfolio section allows a related investor to review the connected primary investor's portfolio performance, allocation, and company-wise investment details based on the selected date range.
